

OFFICIAL BUDGET PROPOSAL

AI-Assisted Development Tooling — Claude Code Subscription
For the Development of VORP: Lazeez Events Internal ERP Platform

Document Ref:	LE-VORP-BUDGET-2026-001
Prepared By:	Syed Raza A. Abidi — Sales Executive, Lazeez Events
Submitted To:	Management / Finance / Stakeholders — Lazeez Events
Date:	18 May 2026
Classification:	Confidential — Internal Use Only
Version:	1.0 — Initial Submission

1. Executive Summary

Lazeez Events has already embarked on the development of VORP (Vendor Operations & Resource Platform) — a comprehensive, web-based internal ERP system purpose-built to serve the full operational breadth of the organization. VORP is designed to unify all departments, eliminating operational silos and replacing multiple expensive third-party SaaS subscriptions with a single, owned, and customized platform.

This proposal seeks authorization for a monthly subscription to Claude Code — Anthropic's AI-powered developer tooling — at either the Max 20x usage plan (USD 200/month) or the Max plan (USD 100/month), to enable accelerated, high-quality development of VORP by the internal development team.

The core challenge is clear: without this tooling, development is severely impaired due to a current credit/payment constraint that prevents the team from procuring the necessary AI development environment. This document justifies the expenditure, demonstrates ROI, and presents a clear path forward for stakeholder approval.

Monthly Investment \$100–\$200 Claude Code Max	Modules Replaced 10+ SaaS Tools Eliminated	Estimated Annual Saving \$12,000+ vs. Current SaaS Stack	Dev Speed Boost 3–5× AI-Assisted Velocity
---	---	---	--

2. Problem Statement & Business Need

2.1 The Credit Constraint — Current Blocker

⚠️ CRITICAL BLOCKER

The development team is currently unable to proceed with VORP development at the required pace due to inability to subscribe to Claude Code. The absence of an approved credit facility or payment method for this subscription has halted AI-assisted development workflows entirely. Every day of delay translates directly into delayed ROI for the organization, continued SaaS expenditure, and deferred operational efficiency.

2.2 Why VORP Exists — The Operational Imperative

Currently, Lazeez Events operates using a fragmented stack of third-party SaaS tools, each with its own cost, data silo, and integration overhead. The following platforms are in use or were previously in use:

Current Tool	Function	Status Under VORP
HubSpot / Zoho CRM	Customer Relationship Mgmt	✓ Replaced by Custom CRM Module
WhatsApp (Business)	Team & Vendor Communication	✓ Replaced by VORP Comms Module
Slack	Internal Messaging & Alerts	✓ Replaced by VORP Comms Module
QuickBooks	Accounting & Finance	✓ Replaced by VORP Finance Module
Jira	Project & Issue Tracking	✓ Replaced by VORP Project Module
Manual WhatsApp	Vendor Account Management	✓ Replaced by Vendor Portal
Ad hoc HR Tools	HR & Payroll Tracking	✓ Replaced by HRIS Module
Manual MOU Tracking	MOU & Contract Mgmt	✓ Replaced by MOU Module
External AI Workflows	Automation & AI Features	✓ Replaced by VORP AI Layer

3. VORP Platform — Scope of Development

VORP is an enterprise-grade, web-based application optimized for mobile access, covering the entire operational lifecycle of Lazeez Enterprise. It is designed for the full team of LE and will be the single source of truth across all departments.

#	Module	Key Capabilities & Features
01	HR & HRIS Module	Employee records, contracts, leave management, payroll tracking, onboarding/offboarding, performance reviews, org chart
02	Project Management Module	Task management, sprint planning, Kanban boards, timelines, team assignment, progress tracking — replaces Jira
03	Finance Module	Chart of accounts, invoicing, expense tracking, P&L, budgets, approvals, audit trail — replaces QuickBooks
04	Sales Dashboard & CRM	Lead pipeline, customer profiles, deal stages, activity logs, sales analytics — replaces HubSpot/Zoho
05	Delivery Management	Order tracking, delivery assignment, status updates, proof of delivery, route management
06	Vendor Management & Portal	Vendor profiles, performance analytics, PO management, contract tracking, linked comms history — replaces WhatsApp-based account management

LAZEEZ EVENTS VORP Internal ERP — Development Budget Proposal		CONFIDENTIAL May 2026
07	Vendor Support Module	Issue ticketing tied to vendor profiles, SLA tracking, escalation workflows, resolution logs
08	MOU Management Module	MOU creation, clause tracking, renewal alerts, approval workflows, digital signatures, version control
09	Communication Module	Internal messaging, channels, announcements, notifications, file sharing — replaces WhatsApp & Slack
10	AI-Based Automation & Workflows	Smart process automation, intelligent routing, predictive alerts, document parsing, workflow triggers
11	Analytics & Reporting Layer	Cross-department dashboards, KPI tracking, custom reports, drill-downs, exportable insights

4. Tool Justification — Claude Code Subscription

4.1 What Is Claude Code?

Claude Code is Anthropic's AI-powered, agentic developer tool — a command-line and IDE-integrated assistant purpose-built for software engineering at production scale. It understands entire codebases, writes complete features, debugs complex logic, writes tests, performs refactoring, and accelerates the full development lifecycle through natural language commands.

4.2 Plan Comparison & Recommendation

Feature / Criteria	Max 100 Plan — \$100/mo	Max 200 Plan — \$200/mo ★ Recommended
Monthly Cost (USD)	\$100	\$200
Annual Cost (USD)	\$1,200	\$2,400
Usage Limit	5× higher than Pro	20× higher than Pro
Context Window	Extended	Extended
Priority Access	Standard	Priority
Suitable for VORP Scope	Moderate — may throttle on peak development days	Optimal — full-day intensive development uninterrupted
Recommended Phase	Phase 2 onwards (maintenance)	Phase 1 (active build — recommended)
ROI vs SaaS Replaced	Strong — 10× return	Strong — 5× return (higher speed compensates)

★ RECOMMENDATION

Start with the Max 200 Plan (\$200/month) during active build phase (estimated 3–6 months). Downgrade to the Max 100 Plan (\$100/month) upon entering maintenance and incremental development phase. This phased approach optimizes cost while ensuring no development bottlenecks during the critical build window.

5. Financial Analysis & ROI Justification

5.1 Current SaaS Stack — Estimated Annual Cost

SaaS Tool Being Replaced	Est. Monthly Cost	Est. Annual Cost	VORP Module Replacing It
HubSpot CRM (Starter)	\$50	\$600	CRM Module
Zoho Suite	\$40	\$480	CRM + Analytics
QuickBooks (Simple Start)	\$30	\$360	Finance Module
Jira (per-seat, ~5 users)	\$40	\$480	Project Module
Slack (Pro)	\$35	\$420	Comms Module
WhatsApp Business API	\$30	\$360	Comms + Vendor Portal
HR Management Tool	\$30	\$360	HRIS Module
External Automation Tools	\$50	\$600	AI Workflow Module
TOTAL CURRENT SAAS SPEND	~\$305/mo	~\$3,660/yr	Fully Replaced by VORP

5.2 VORP Development Cost vs. Savings

Cost Item	Amount (USD)	Notes
Claude Code Max 200 (6-month build phase)	\$1,200	Active development period
Claude Code Max 100 (6-month maintenance)	\$600	Post-launch maintenance
Total Year-1 Tooling Cost	\$1,800	Full 12 months combined
SaaS Stack Savings (Year 1)	−\$3,660	Tools replaced by VORP
Developer Time Saved (3× velocity est.)	Qualitative	Faster delivery = earlier ROI
NET FIRST-YEAR FINANCIAL BENEFIT	+\$1,860	Direct savings after tooling cost

6. Stakeholder Benefits Analysis

Stakeholder	Benefits Delivered by VORP + Claude Code Investment
Management / CEO	Full operational visibility across all departments via unified dashboards; real-time KPIs; reduction in vendor management overhead; elimination of fragmented tool costs; data-driven decision making.
Finance Team	Integrated accounts, invoicing, and P&L in one platform; no more QuickBooks subscription; full audit trail; automated reporting reduces manual effort by an estimated 60%.
HR Department	Centralized HRIS eliminating manual spreadsheet HR tracking; automated leave, payroll records, and onboarding workflows; compliance-ready documentation.
Project / Dev Team	Jira replaced internally; sprint planning, Kanban, and issue tracking built into VORP; Claude Code enables faster feature delivery with significantly less manual coding overhead.
Sales & CRM Team	HubSpot/Zoho replaced with a custom CRM tailored to LE workflows; integrated sales dashboard with real-time pipeline, analytics, and customer 360 view.
Delivery Team	Dedicated delivery module with live status, proof of delivery, and route management — no more tracking via WhatsApp threads.
Vendor Relations	Vendor Portal replaces ad-hoc WhatsApp account management; analytics per vendor profile; issue ticketing linked to vendor; communication history in one place.
All Staff	A single, unified platform replaces WhatsApp and Slack for internal comms; AI-driven automation reduces repetitive tasks; mobile-accessible from any device.

7. Risk Assessment & Mitigation

Risk	Severity	Mitigation
Subscription not approved — development stalls	HIGH	This document formally requests authorization; interim workaround severely limits productivity and delays launch by months.
Over-reliance on AI tooling	LOW	Claude Code is a productivity accelerator, not a replacement for engineering judgment; all output is reviewed by senior developer.
Cost exceeds budget	LOW	Phased plan: Max 200 for active build → Max 100 for maintenance; monthly review checkpoint built in.
Scope creep in VORP modules	MEDIUM	Modules are clearly defined in this document; change requests require Team Lead and Management sign-off.
Data security during development	MEDIUM	Claude Code processes code only — no production data is transmitted; Anthropic maintains enterprise-grade data policies.

8. Budget Approval Request

FORMAL BUDGET REQUEST

PRIMARY REQUEST (Recommended):	Claude Code Max 200 — USD 200/month
ALTERNATIVE REQUEST (Minimum Viable):	Claude Code Max 100 — USD 100/month
Budget Period:	12 months (May 2026 – April 2027) monthly paid – if the development completed within next quarter or 5 months then the subscription will be cancel, saving ultimate cost.
Payment Method Required:	Company credit card / approved payment method for Anthropic subscription
Cost Centre:	Technology / ERP Development

9. Monthly Billing Structure — Payment Clarity

This subscription operates on a recurring monthly billing cycle charged directly to Anthropic. The table below breaks down the exact monthly commitment and the phased cost model recommended for Lazeez Events:

Billing Phase	Plan	Monthly Charge (USD)	Duration
Phase 1 — Active Development (Recommended)	Max 200	\$200 / month	Month 1–6 (Est. Jun–Nov 2026)
Phase 2 — Maintenance & Incremental Dev	Max 100	\$100 / month	Month 7–12 (Est. Dec 2026–Apr 2027)
TOTAL 12-MONTH BILLING COMMITMENT	—	\$1,800 total	May 2026 – April 2027

IMPORTANT — MONTHLY RECURRING CHARGE

This is a month-to-month subscription — there is NO annual lock-in contract. Lazeez Events retains full flexibility to upgrade, downgrade, or cancel at any billing cycle. The charge of USD 100 or USD 200 will be billed automatically each month to the designated company payment method. Immediate action is required to resolve the current credit/payment access issue so that billing can be activated and development can commence without further delay.

10. Authorization & Sign-Off

Role	Name	Signature & Date
Reviewed By (Team Leads)	_____	_____ / _____.____.2026
Approved By (Finance)	_____	_____ / _____.____.2026
Final Approval (Management)	_____	_____ / _____.____.2026

11. Conclusion

The VORP ERP platform represents a transformational investment for Lazeez Events — a single, unified, AI-powered system that replaces over ten fragmented SaaS tools, eliminates communication silos, and delivers real-time operational intelligence across every department.

The Claude Code subscription is not a luxury — it is the essential development accelerator that makes it feasible for a lean internal team to build a platform of this scale, quality, and speed. Without it, development either stalls entirely or proceeds at a fraction of the velocity, dramatically increasing time-to-ROI.

At USD 100–200 per month — billed monthly with no lock-in — against an estimated USD 3,660 in annual SaaS savings, this investment pays for itself within the first two months of VORP's launch. The request is financially sound, strategically essential, and operationally urgent.

I respectfully request the immediate approval of this budget to unblock development and initiate the full build phase of VORP for Lazeez Events.
